Continuation Sheet (PTO-303)

Continuation of 3. NOTE: The amendments to claims including the newly added limitations to claim 5 raise 35 USC 112, first and 35 USC 103 prior art issues that require a new search and examination. More specifically the limitation of a therapeutic and essential gene that allows virus replication, and further limitations for expression require a search of the specification for support, and the relevant art for such a limitation.

Continuation of 11. does NOT place the application in condition for allowance because: As noted above, the amendments to claims including the newly added limitations raise new issues that require a new search and examination for determining the patentability of the claims as amended. Since the amendments have not been entered, Applicants' arguments do not apply to the claims that are pending.
